In order to manually delete the temp files, open the 'dmg' package and locate the 'com.anxious-media.KillDisk' folder. Here you will find all of the temporary files as well as the 'data.sqlite' file, which can be renamed to 'data.sqlite.bak' if desired. There are several ways to delete the SQLite database, the easiest being the following. Delete the database from the package file. If using version 7.1.12 of the software you can do this using the following command in the terminal: sudo mv 'com.anxious-media.KillDisk.pkg' 'com.anxious-media.KillDisk.pkg.bak' Delete the database from the 'dmg' package file: sudo mv 'com.anxious-media.KillDisk.dmg' 'com.anxious-media.KillDisk.dmg.bak' Delete the database from the database file: sudo mv 'com.anxious-media.KillDisk.sqlite' 'com.anxious-media.KillDisk.sqlite.bak' Deleting the.SQLite Database To delete the database from the database file, you must first open the.sqlite file in a text editor such as 'TextPad' or 'Notepad'. Once the file has been opened, you must delete the database by typing the following command into the terminal: update sqlite3.db delete * from sqlite3.db This is the method that I prefer as it updates the database file by not dropping the file so all of the information and file structures remain intact. Deleting the.sqlite database If using version 7.1.12 of the software you can do this using the following command in the terminal: sudo mv 'com.anxious-media.4bc0debe42
